Technical Expertise

We help our customers with our vast experience in design and development of applications in various platforms and languages to make judicious decisions about technology and architecture.

Our technology skills matrix is given below

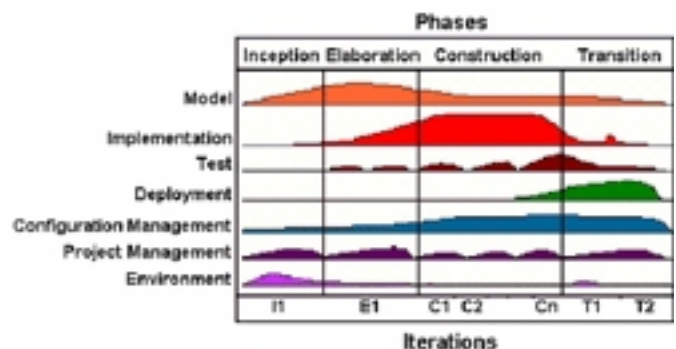

"Web 2.0 technology is our core competency. Our Web 2.0 Certified developers excel in developing web based solutions in solving clients' problems"

kCube's Approach

At kCube we want to design, develop and deliver high quality solutions in the quickest possible time. Hence we have bridged Agile methodology with traditional project methodology to form kCube's Global project delivery approach. Planning is collaboratively done with the customer and applications are developed using Incremental life cycle. Guiding principles of our hybrid agile process are

- Embrace change to deliver customer value
- Plan and deliver Software frequently
- Human Centric
- Technical excellence
- Customer Collaboration

KCubians - "Work is a celebration"

KCubians are the biggest assets of the company. The company was founded by alumnus of top ranked professional college - Anna University.

The partners bring together 21 years of software experience and business knowledge by working across the globe with top IT firms. Hence we always believe in "investment of right people".

To narrate a few characteristics of kCubians

- Belong to the top professional college across the country
- Believe work as a mode of celebration.
- Motivated young and energetic talent working in a competitive environment
- Continuously "hone their skills" with regular technical and non-technical, internal and external training.

kCubeVantage

kCube tries to overcome the regular off-shoring problems and differentiate itself using the same. Our Managers always strive to deliver our clients vision into cost effective but efficient business solution. Our differentiating factors are depicted as below:

Existing concerns for IT Outsourcing

Requirements compliance

Personalized service ensuring 100% focus to the customer. Our dedicated approach have always ensured high quality solutions exceeding the customers requirements.

Risk & Information Security

kCube Global delivery model has proven record in delivery excellence. With **minimal risk** and **maximum security** at offshore our client can be rest assured about their privacy during their engagement.

Lack of Control on Project execution

Transparency have always been our key philosophy, hence our customers feel involved at all stages of engagement.

Poor resources, Low quality of work

kCubians have always been a great asset to us. By employing resources from **top ranked professional colleges**, We come out with highly economical and cost effective business solutions to our Customers.
